

DIVESTMENTS

Divestment, is shorthand for institutional pressure against complicit corporations that are knowingly and persistently implicated in Israel's crimes.

To make institutions apply this institutional pressure on complicit corporations, grassroots solidarity movements and civil society groups must apply pressure on pension and investment funds and other institutions (such as city councils, universities, trade unions, etc.) to, in turn, cut back irrevocable contracts, investments, and/or other financial ties to such complicit corporations. Institutional pressure includes most prominently, and whenever feasible, the following forms:

Exclusion from sourcing/procurement contracts

(whenever viable alternatives exist)

Divestment (for funds/institutions that invest in the global stock markets)

Shareholder activism

Strategic litigation
